Gulfco sampling data update - Eric Pastor sent me the Gulfco analysis reports (unvalidated) yesterday, so I should receive it soon. Its on two DVDs (large files) - can everyone read a DVD? If so, I'll get copies to everyone. If not, I'll see about getting in on CDs. Also, we should receive summary tables with the validated Intracoastal Waterway data sometime next week.

OK. FYI, I expect the sediment sample results next week. The results will be used to pick the analyte list for fish/crab tissue analysis, so October looks good for fish sampling (allowing time for picking analytes, planning, mobilization, etc.). I haven't heard about additional sediment sampling later this month, but its possible - we still have the offsite locations in the marsh to do, and that was to be done following assessment of the on-site sediment samples, which we get next week.

Gary,

Please let me know ASAP for the next round of sampling to be conducted. I've stayed in contact with the sub that will be collecting the tissues. They seem to think some additional marsh sediments samples will be collected later this month, with the tissue sampling to be done in October. I gave them my schedule so they could attempt to incorporate it into the planning.

Subject: Gulfco Human Health Risk Assessor

Luda,

FYI, the EPA human health risk assessor for Gulfco is Dipanjana Bhattacharya (214/665-6753). As we discussed today, I expect the sediment sample results next week from PBW, and we will need to determine the analyte list for the fish tissue sampling from these results.

Regards,

Gary Miller
